We're a turn-key provider – we construct, install, commission and service a wide variety of components, structures and facilities worldwide.

Rig Up Services has the management, man-power and mobility to tackle large-scale projects for the next generation of energy facilities and structures, worldwide. We are a leading provider of turn-key solutions including: Electrical Services, Custom Fabrication, and Industrial Coatings. With a highly skilled force of job superintendents,

foremen, and experienced technicians including master/journeymen electricians, welders/fitters and support staff, we get the job done through higher safety protocols, lower interventions, and performance efficiencies to serve scheduled goals and budgets – *from the ground up.*

Headquartered in Channelview, Texas and with teams deployed at customer sites around the world, Rig-Up Services provides its diverse customer base with superior service and results.

Rig-Up Services is a Licensed Electrical Contractor and is ISO 9001:2008, API Specification Q1 and ISO/TS 29001 Certified.

“I have reviewed your history with Texas Mutual and agree with our Loss Prevention personnel that **your company has an outstanding safety record with Texas Mutual.** Overall, Texas Mutual has observed management displaying a commitment to safety and their employees.

Your August 19, 2010 Experience Modifier factor has been calculated to be .50. This modification factor indicates that your past performance would indicate that your future losses would be 50% of the industry expected losses.”

Sincerely,

Richard A. Dabney
Texas mutual Insurance Company
Underwriting Compliance Officer

“We are pleased to introduce Rig-Up Services, Inc. as a preferred client of Dean & Draper Insurance.

Rig-Up has earned an impressive 0.62 Experience Modifier, a number that is reserved for much larger companies with premium volumes that dilute the claims ratio.

Such a low modifier is indicative of Rig-Up's overall culture as it relates to safety and the level of commitment to high safety standards.”

Sincerely,

Sonny Covington
Commercial/Industrial
Senior Agent

Offering A Broad Range of Turn-key Services – Worldwide

Electrical Construction, Service and Maintenance – Executed to a Higher Standard

Rig-Up Services' team of electrical professionals is skilled at the analysis, procurement and installation of all electrical components and wiring required to make a component, structure or complete facility fully functional. Rig-Up Services is well known as a top-quality provider of electrical services for industrial plants, oil & gas structures and commercial facilities.

Rig-Up's Electrical Services Division consists of several teams of skilled electrical technicians dedicated to providing construction, repair, maintenance and a wide range of other electrical services at our facility, your facility and project sites. Rig-Up has a long history of dedication to electrical services and has completed projects across the United States and on six continents around the world.

With all electrical installations, we at Rig Up Services exercise the following SOP formula to insure and perpetuate, both higher safety standards and production momentum:

Higher Safety Protocols = Lower Intervention = Higher Output & Performance

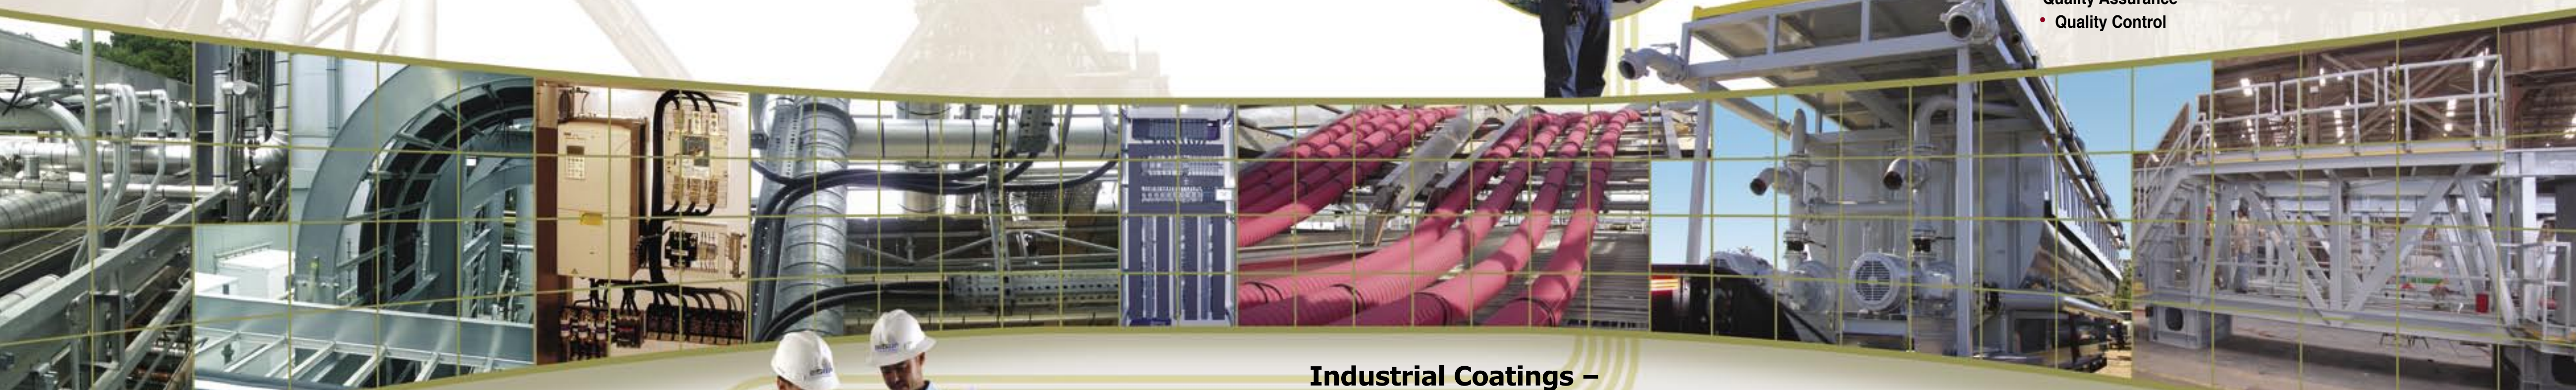

It's our pledge to our clients to offer steadfast dedication to safety, efficient craftsmanship and superior results.

Rig-Up provides the following electrical services with our highly experienced and capable teams of Superintendents, Foremen and Master / Journeyman electricians:

- Design/Build Consultation
- New Construction
- I & E Construction
- Remodels/Resets
- Technology Rollouts
- Equipment Rollouts
- Multi-location or Single Site
- Energy Conservation Initiatives
- Motor Control Centers (MCC)
- PLC/Motor Controls
- Satellite Installation & Programming
- Preventative Maintenance
- Emergency Power
- Quality Assurance
- Quality Control
- UPS
- Power Quality Analysis
- Generator System Design
- Power Distribution
- Energy Consumption Analysis
- Wiring and Switches
- Moves, Add-ons and Changes

Our Working Philosophy:
Higher Safety Protocols = Lower Intervention = Higher Output & Performance

Industrial Fabrication – State-of-the-Art Facilities and Credentials

Rig-Up is a well known and highly respected API / ISO manufacturer of large industrial metal structures and components. Our fabrication facility is located near the intersection of Beltway 8 East and Interstate 10 in Houston. Our fabrication process starts with an idea, plan, or set of drawings provided by the customer – Rig-Up's craftsmen use their skill, experience and state-of-the-art equipment to make the customer's designs a reality. Given a set of drawings our team can fabricate any structure, component or apparatus our industrial or energy-related customer may have.

The Fabrication Services:

- Mechanical Unitization
- Skidded Structures
- Enclosed Structures
- Insulated Structures
- Arched Roof Designs
- Pitched Roof Designs
- Custom Metal Crimping
- CAD Plasma Cutting

Industrial Coatings – Operating Facilities 365 Days A Year, 24/7

Rig-Up offers state-of-the-art custom painting and coating solutions for customers worldwide. Our shops are capable of executing those large projects requiring round-the-clock output, every day of the year. The Company boasts a 40' x 80' steel grit blast room along with two 40' x 80' paint rooms. All are totally enclosed and climate controlled to ensure quality.

We are recognized for our superior craftsmanship and exceptional delivery in blast/paint work by third-party paint inspectors. Our paint foreman has over thirty-five years experience as a coatings specialist, having trained

paint foremen at major companies throughout the United States. Paint is applied in enclosed booths by experienced applicators using precision paint guns. Two, three and four coat paint systems are employed. Paint is applied to the exact specifications and colors of our customers.

Rig-Up uses Martinsite 40 and 80 gauge steel grit for blasting. This provides our customer a smoother, more uniform finish and less surface contamination. Importantly, this system is environmentally friendly and results in far less waste when compared to sand.

At Rig Up, our goal is to be your one-source, turn-key provider to construct and service your facility needs, with a higher standard of safety, performance and execution – from the ground up.

Call our representative today, and let's start talking solutions, for your next project.
